

## First Aid and Coronavirus management - instructions for summer term

When administering first aid or supporting a child with a medical condition, please follow the guidance below:

### Treating pupils and staff

1. Please continue to keep a 2M distance from pupils and staff.
2. If a child is injured or unwell while in school and needs direct personal care please keep contact to a minimum and wash your hands prior and after to contact with the child
3. If staff or pupils develop coronavirus symptoms while at school they must be sent home.  
Symptoms:
  - a new continuous cough
  - a high temperature
  - a loss of, or change in, your normal sense of taste or smell
4. If a pupil becomes unwell with symptoms of coronavirus while in school and needs direct personal care until they can return home a fluid-resistant face mask should be worn by the supervising adult and the pupil if a distance of 2 metres cannot be maintained. If contact with the child or young person is necessary, then disposable gloves, a disposable apron and a fluid-resistant surgical face mask should be worn by the supervising adult. If a risk assessment determines that there is a risk of splashing to the eyes, for example from coughing, spitting, or vomiting, then eye protection should also be worn.
5. Supervise the pupil in a space ventilated and isolated from others e.g. medical room
6. Notify SLT member on call asap
7. Notify site team

### Instructions for donning full PPE:

1. Wash your hands
2. Put on PPE (in any order)
3. Do not touch your face whilst wearing PPE
4. Remove all PPE and place in a bin, remove gloves last
5. Wash your hands again

### CPR:

1. Call 999 immediately – tell the call handler if the patient has any COVID-19 symptoms
2. Ask for help. If a portable defibrillator is available, ask for it
3. Before starting CPR, to minimise transmission risk, use a cloth or towel to cover the patient's mouth and nose, while still permitting breathing to restart following successful resuscitation
4. Use the full PPE:
  - Disposable gloves
  - Disposable apron
  - Fluid-resistant surgical face mask
  - Eye protection (visor or goggles)
5. Only deliver CPR by chest compressions and use a defibrillator (if available) – **don't** do rescue breaths
